- Leadership abilities
- Outstanding Organizational Skills

- Excellent Problem-solving Skills
- Proficiency in relational databases and data schema design
- Thrive in a fast-paced environment

Experience

.NET Coding Instructor, 02/2020 to Current
Centriq Training – St. Louis, MO
- Sat through multiple courses in the program to get familiar with the material and teaching style used at Centriq to prepare for when I start teaching the program myself.
- Helped guide any students that were struggling with any projects or homework they were assigned.

Software Engineer, 12/2018 to 02/2020
The Phoenix Group – O'Fallon, MO
- Developed multiple APIs to work with our software, Fusion, that gave users in and out of the company access to more data we recorded as well as let them have more control over that data.
- Took lead on setting up a new console application to give one of our client better access to specific parts of order information that they had originally no easy way of getting. This console application is now setup to be used by many other clients we work with.
- Worked on setting up unit tests to help with QA testing for our software, Fusion.

Software Engineer, 05/2016 to 12/2018
Avala Marketing Group – Fenton, MO
- Managed Avala's Kanban team and trained new hires.
- Wrote server-side code for web-based applications and built applications using client-based script technologies.
- Created and implemented an error logging service to keep track of errors across all our platforms.
- Designed, built, and tested multiple websites and parts of Avala's software, Aimbase.

Education

Bachelor of Science in Computer Science – May 2016
Evangel University – Springfield, MO
